

Manufacturer/importer enters product data in AMS national PRS

Functioning API in AMS national PRS?

No

Yes

AMS regulator regularly exports product dataset to ACE (monthly)

Data quality checks/cleanup by ACE

ACE uploads manually dataset to regional database

Regional database automatically obtains product data from AMS national PRS via API.

Regional database sends regular email notifications to AMS regulators:
*e.g. New registrations in other AMS
Registrations revoked in other AMS
etc...*

AMS regulators can log into regional database & see product information in other AMS
